1 ABOUT THE APP

The Electronic Check Signature app enables users to dynamically assign up to two signatures on cheques based on specific dollar amounts set by the user. The app allows creating custom cheque templates using supported template formats or using pre-existing templates for cheques and various cheque/stub combinations.

This app allows users to expedite the payment process by eliminating the need of manual signatures.

For more information, please go to <https://www.randgroup.com/apps/microsoft/dynamics-365-business-central/electronic-check-signature/>

2 BASIC SETUP

This section covers the basic setup needed to use the Electronic Check Signature application. These steps should be completed before using the app.

2.1 Signatures and Signature Amounts

The Check Signature Printer application allows users to dynamically assign up to two signatures to checks based on user-defined dollar amount thresholds. To upload signatures and enter signature amounts, search for purchase and payables setup.

Tell me what you want to do ↗ ✕

Go to Pages and Tasks

 - Delete

1. Expand the Factbox pane.
2. In the Factbox pane, expand the Check Signatures menu.
3. Select Import. Locate your preferred signature file and click Ok.
4. Enter the amount corresponding to the uploaded signature.

The signatures created will be printed on cheques when the cheque amount is lower than the signature amount.

2.2 Check Layouts

The application provides the following report layouts: Check (1401), Stub/Stub/Check (10401), Stub/Check/Stub (10411), and Check/Stub/Stub (10412). To select the layouts offered by the app, search for Report Layout Selection.

3 FUNCTIONALITY

The application allows users to dynamically select the signatures that are printed on checks based on user-defined signature amounts. Signatures are printed when the cheque amount is lower than the signature amount.

3.1 Printing Signatures in Checks

To print a check, search for Payment Journals.

Tell me what you want to do ↗ ✕

payment journals

Go to Pages and Tasks

> Payment Journals Tasks 🔖

In the Payment Journals window, select the payment for which a check will be printed. Make sure that the Bank Payment Type field is set to Computer Check.

Payment Reference	Amount	Debit Amount	Credit Amount	Bal. Account Type	Bal. Account No.	Applied (Yes/No)	Applies-to Doc. Type	Applies-to Doc. No.	Applies-to Doc. Due Date	Bank Payment Type	Transaction Type Code
	500.00	500.00		Bank Account	CHECKING	☐				Computer Check	BUS

Expand the Check menu, then select Print Check.

Payment Journals ✓ Saved 🔖 🔄 🔍

Print Check... 🔄 Void Check 🔄 Void All Checks 🔄 Preview Check 🔄 Print all Checks... 🔄

In the Print window that appears, confirm that you have selected the “Check with Signature” Report Layout provided by the app. At the top of the window, confirm that you are about to print the report format you need (Check, Stub/Stub/Check, Stub/Check/Stub, Check/Stub/Stub).

To learn how to set the appropriate report formats and layouts, refer to the [Basic Setup](#) section of the present user guide.

The screenshot shows a print configuration window. At the top left, the word "Check" is highlighted with a red box. To its right are icons for a link and a close button. Below this, there are three rows of settings:

Printer	(Handled by the browser) ▾
Report Layout	Check with Signature ...
Use default values from	Last used options and filters ▾

The "Check with Signature" option in the Report Layout row is highlighted with a red box.

Click the Print button found at the bottom of the window.

The screenshot shows the bottom of the print window with four buttons: "Send to...", "Print", "Preview", and "Cancel". The "Print" button is highlighted with a red box.

4 REPORTING

4.1 Check Printouts

Once users generate a payment and click the Print button found at the bottom of the Report window, the application generates a PDF file that includes the appropriate signatures. The following is a sample check generated by the app.

Fabrikam, Inc.		February 8, 2023		Check No. 206	
Document No.	Document Date	Posting Description	Amount	Discount	Net Amount
		Fabrikam, Inc.	500.00	0.00	500.00
				Total	500.00
				99 99 999	206

		Fabrikam, Inc.	500.00		500.00
				Total	500.00

5 SECURITY

The Electronic Check Signature app, along with the rest of Rand Group's Dynamics 365 apps, have a built-in AutoPermission security functionality. When a user with the proper credentials installs an App, the AutoPermission function automatically triggers and assigns or updates the user's permissions. No other action is needed from the user.

When a user without the proper credentials installs an App, the AutoPermission function allows the installation, but user permissions are not changed. In this case, a user with the proper security credentials can change the user's permissions later.

To change user permissions, search and go to the User list.
